

LABEL EXPRESS

Vendor Managed Shipping and Receiving Labels Over the Internet

Growing numbers of retailers, vendors and carriers are saving money by using bar coded shipping and receiving labels to identify and track product from manufacturer ship points, through carrier transportation, and into the retail distribution center. With FurnishNet's **LabelExpress** it's easier than ever for trading partners to participate in supply chain initiatives for standardized as well as customized bar code label production for integration with carrier and retailer systems.

LabelExpress is a Web-based label generator that links to FurnishNet's Advance Ship Notice program for easy provisioning of UCC 128 UCC/EAN-128, SCC-18 labels and more to fulfill trading partner requirements. With a

few simple mouse clicks, preformatted, retailer specific labels can be generated to exact carton shipment quantities and printed on any Windows-compliant printer.

LabelExpress maintains a library of ready-to-print formats, including pre-defined bar code components, and supports SSCC-18 serial numbers in the industry standard UCC128 format. When required, labels can also be easily customized to trading partner needs for maximum flexibility. And best of all there's no software to buy or maintain.

For retailers, vendors and suppliers, FurnishNet's **LabelExpress** is a great way to reduce shipment prep costs while improving accuracy and streamlining product tracking throughout the order-to-receipt cycle.

KEY FEATURES

- Supports the Advance Ship Notice (856) transaction set
- Conforms to UCC-128 and SSCC-18 bar code standards
- Supports retailer generated ID numbers
- Supports shipping labels for merchandise orders
- Supports shipping labels for parts orders
- Provides a library of ready-to-print label formats
- Customizable to trading partner requirements
- Supports graphics and industrial symbols
- Supports SSCC-18 number serialization and more
- Easy match-off of labels to carton counts ensures accurate printing
- Works with any standard Windows compliant printer
- Reprint individual labels or print additional labels when needed
- Allows for unlimited trading partners
- Easy-to-use web browser interface
- No software to purchase or maintain
- Automated trading partner label format integration

FurnishNet is the Practical, Affordable Answer to EDI

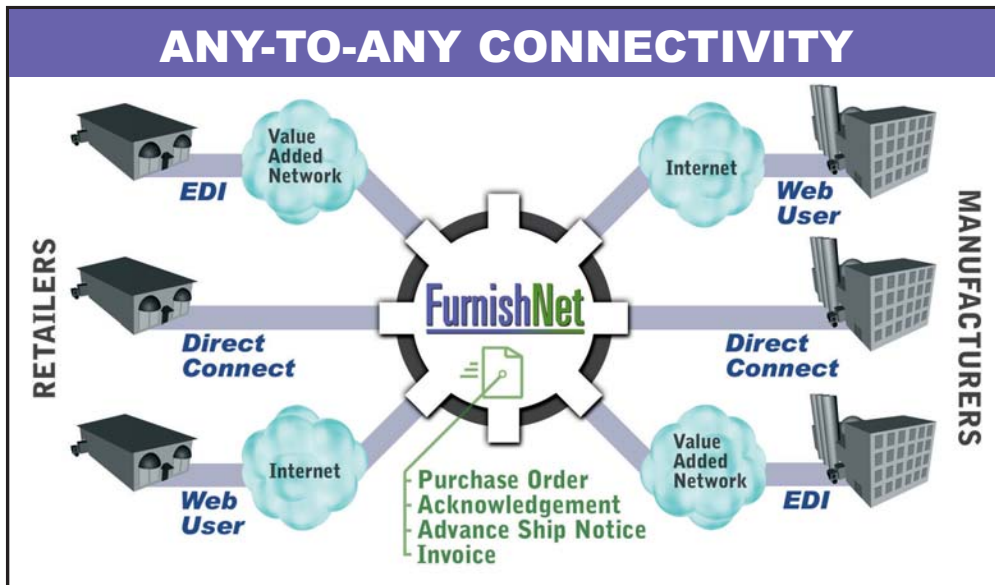

The FurnishNet solution integrates e-mail, web applications, electronic data interchange (EDI), and XML into a unique "Any-to-Any" exchange. FurnishNet is able to translate data files into appropriate formats for the electronic flow of information between trading partners of any size, running on any corporate system. Because the

FurnishNet service is able to transfer data without the use of a VAN, the need for expensive EDI mapping software as well as a traditional EDI VAN network are eliminated, thereby reducing expenses and simplifying connectivity.
